ENGINEERING RESUME

Gabriel Maj

Electronics Engineer | Circuit Design & Simulation

gabrielmaj8@gmail.com linkedin.com/in/gabriel-maj-181662235
github.com/Gabrys2405

Electronics engineer with experience in automotive hardware development, circuit design, electrical simulations, analysis and prototype testing.

PROFESSIONAL EXPERIENCE

Electronics Simulations and Analysis Engineer — 2026 - PRESENT

Bury Sp. z o.o.

- Worst Case Circuit Analysis (WCCA), Mathcad calculations, circuit simulations and theoretical analysis.
- Electrical circuit simulations in LTspice and PSpice, including power-line transients; simulation automation using Python.
- Technical collaboration and peer reviews; introduction to CST Studio Suite for power/signal integrity and thermal analysis.

Junior Electronics Engineer — 2024 - 2026

Merit Automotive Electronics Systems

- Automotive circuit design, calculations and simulations; technical documentation, prototyping and testing.
- EMC troubleshooting, collaboration with engineering teams and participation in hardware reviews.

Electronics Trainee — 2022 - 2024

Merit Automotive Electronics Systems

- Circuit schematics, simulations, reviews, electronic measurements and prototype testing.
- Collaboration with software, hardware and mechanical engineering teams.

EDUCATION

Electrical Engineering - Master's studies (part-time) — 2024 - 2026

AGH University of Science and Technology

Automatic Control and Robotics - Bachelor's degree — 2020 - 2024

AGH University of Science and Technology

TECHNICAL AREAS

Circuit design: Electronics, WCCA, EMC/EMI, power electronics, technical documentation
Simulation: LTspice, PSpice, Mathcad, MATLAB/Simulink, introductory CST Studio Suite
PCB & embedded: KiCad, Mentor Graphics, STM32, C, prototyping
Software & collaboration: Python, Git/SVN, Teamcenter
